DETAILED ACTION

1. This office action is in response to Applicant's RCE filed on 01/06/2006.

2. Claims 1-15 are pending.

Allowable Subject Matter

3. Claims 6 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

5. Claims 1-15 are rejected under 35 U.S.C. 102 (e) as being anticipated by Philips US 2002/0107802A1.

As per claim 1, Philips discloses a method of downloading music over the internet, comprising;

Identifying content to be downloaded by inputting the content to a processing device [processing device or microprocessor 52, fig 1] see., abstract, page 1-page3, Phillips discloses Applicant's newly added limitation in fig 1, item 52, specifically page 3 wherein said CPU 52 processes the data under the control of an operating system....

Therefore, the processing device is readable as a CPU for processing data);

Partitioning the content <u>using a program executed by the processing device</u> (or microprocessor 52, fig 1) into at least two sections wherein each of the at least two sections has a duration which is less than a threshold duration value assigned by the screening algorithm (see., abstract, pages 1-8. It is inherent to recognize that each AUDIO/VIDEO has a plurality of sections (sections or tracks). Also, each section or track has a time duration);

Subjecting the partitioned content to the screening algorithm (see., abstract, pages 1-8, algorithm or encryption).

As per claims 2 and 3, Philips discloses the claimed method wherein the screening algorithm is a secure digital music initiative screening algorithm see., abstract, pages 1-8, algorithm or encryption).

As per claim 4, Philips discloses the claimed method wherein the content is downloaded from the internet (see., page 2).

Application/Control Number: 09/998,082

Art Unit: 3621

6. Claims 1-5, and 8-15 are rejected under 35 U.S.C. 102 (e) as being

anticipated by Tagawa et al US 2005/0010795 A1.

As per claims 1-15 Tagawa discloses a digital data recording medium,

comprising;

Identifying content to be downloaded by inputting the content to a processing

Page 4

device (or host computer or PC 201, page 4, [0065, page 9, [0129]) see., abstract, page

1-page15;

Partitioning the content into at least two sections wherein each of the at least two

sections has a duration which is less than a threshold duration value assigned by the

screening algorithm (see., abstract, pages 1-16. It is inherent to recognize that each

AUDIO/VIDEO has a plurality of sections (sections or tracks). Also, each section or

track has a time duration);

Subjecting the partitioned content to the screening algorithm (see., abstract,

pages 1-16, algorithm or encryption).

RESPONSE TO ARGUMENTS

7. Applicant's arguments filed on 08/05/2005 have been fully considered but

they are not persuasive.

REMARKS

8. In response to Applicant's arguments, Applicant has stated that:

a. neither Philips nor disclose partioning downloaded content into at least two sections

Art Unit: 3621

wherein each of the at least two sections has a duration that is less than a threshold duration value. However, the Examiner respectfully disagrees with this assertion since Philips and Tagawa disclose this limitation in pages 1-8.

- b. each section or track of a recorded item has a time duration. As indicated above, it is inherent to recognize that each AUDIO/VIDEO has a plurality of sections (sections or tracks). Also, each section or track has a time duration.
- c. Applicant also argues that Philips fails to disclose the step of "downloading by inputting the content to a processing device" (processing device or microprocessor 52, fig 1). However, the Examiner respectfully disagrees with this assertion since Philips discloses this limitation in the abstract, page 1-page3, specifically wherein said CPU 52 processes the data under the control of an operating system.... Therefore, the processing device is readable as a CPU for processing data).
- d. Furthermore, Applicant argues that Tagawa fails to disclose the step of "downloading by inputting the content to a processing device (processing device or Host computer or PC 201)". As noted in the previous rejection and hereby incorporated by reference, the cited reference Tagawa discloses this limitation in page 4, [0065, page 9, [0129]) see., abstract, page 1-page 15.

Conclusion

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Pierre E. Elisca whose telephone number is 571 272 6706. The examiner can normally be reached on 6:30 to 5:00.

Application/Control Number: 09/998,082 Page 6

Art Unit: 3621

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Trammell can be reached on 571 272 6712. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).

Pierre Eddy Elisca

Primary Patent Examiner
